Novus Spectra
Premier dual-port photocogulator for OR and Clinic

NEW - Now with Dual Port
Passion for ophthalmic lasers that dates back more than 40 years!

At Lumenis, we truly understand photocoagulation technology; that is after all only one of the privileges reserved for the company that pioneered the first argon laser photocoagulator for ophthalmology. It is also precisely the reason why the decisive majority of ophthalmologists around the globe have actively chosen to purchase Lumenis photocoagulators for the past 40 years – making Lumenis the global market leader and the company with the largest installed-base of ophthalmic laser photocoagulators worldwide.

Novus Spectra

Premier, high-powered, photocoagulator

The Lumenis Novus Spectra is an innovative photocoagulator with an extensive set of features that deliver power and reliability with proprietary advancements in diode-pumped solid-state technology. Next-generation DPSS technology drives 2.5 W of power from the compact Novus Spectra system and an active resonator temperature control ensures stable beam output and system reliability. Versatile, efficient and compatible with a wide-array of delivery devices, the dual-port Novus Spectra was designed to provide optimal results in the operating room and outpatient clinic.
**SureSpot™ Optics**

Sharply defined and evenly distributed power on the retina; Safe & low-power density at the cornea and the lens

As with all Lumenis photocoagulators, the Novus Spectra incorporates SureSpot Optics Technology in all Slit Lamp adapters.

The unique and patented SureSpot optics technology from Lumenis ensures that the focal point of the laser beam is maintained on the retina while power density on the cornea and lens is minimized for increased safety.

SureSpot optics also creates a true 50-micron laser spot; that capability distinguishes the Lumenis technology from other lasers that may have a 100-micron minimum spot size and/or project a fuzzy laser spot on the retina.

In essence, SureSpot optics improves treatment efficacy and precision while reducing the potential for damage to anterior-segment tissues. The latter occurrence is especially a concern when using wide-angle lenses that enhance light uptake by the cornea and lens.
The Ideal Product for the OR

- **Ergonomic & Compact OR Cart**: with built-in storage for accessories
- **Remote control**: conveniently adjust laser parameters
- **Dual Fiber Port**: switch instantly between endo-probe and LIO
- **PowerEase™ Footswitch**: hands-free power adjustment

**LIO**: Choose a multicolor Laser Indirect Ophthalmoscope that suits your preferences. Both our Heine™ and Keeler™ models are rugged, lightweight and equipped with the most advanced laser delivery technology in the market.

**Endo Probes**: a comprehensive and wide selection of ophthalmic endo probes to meet every clinical need and indication. These include standard, straight, curved, aspirating, illuminating and stepped in 20, 23 and 25 gauge sizes, among others.

**Endo Kit**: surgical microscope eye safety filter with the Lumenis patented ClearView™ technology. The photopic balanced coating eliminates color distortion of the treatment site while optimizing white light transmission or “brightness” of the physician’s view.

**PowerEase™ Footswitch**: The Lumenis “PowerEase™” footswitch provides hands-free power adjustment of the laser by toggling left or right within the footswitch housing.

**Eye Safety Filters available for**: Zeiss*, Wild*, Moller-Wedel*, Leica*, and Topcon* microscopes
The Ideal Product for the Clinic

- Compatible with your preferred Slit Lamp
- Compact, lightweight and space-saving
- Patented SureSpot Optics
- Designed for the busy practice with high patient throughput

**PowerEase™ Footswitch:** The Lumenis “PowerEase™” footswitch provides hands-free power adjustment of the laser by toggling left or right within the footswitch housing.

**LIO:** Choose a multicolor Laser Indirect Ophthalmoscope that suits your preferences. Both our Heine™ and Keeler™ models are rugged, lightweight and equipped with the most advanced laser delivery technology in the market.

**LaserLinks:** The Lumenis family of LaserLink Slit Lamp adapters will transform most commercially available slit lamps into advanced laser delivery devices with superior optics capabilities.

**Eye Safety Filters:** a selection of automatic and fixed eye safety filters for the Slit Lamp with the Lumenis patented ClearView™ technology. The photopic balanced coating eliminates color distortion of the treatment site while optimizing white light transmission or “brightness” of the physician’s view.
The Novus Spectra Advantage

Superior Optics
Homogeneous laser spot at target tissue
Our advanced optics and laser delivery technology features uniform energy distribution across the entire laser spot area for more precise and safer treatment. The result is a homogenous laser spot with evenly distributed power across the full diameter of the spot, eliminating the potential risk for the formation of “hot spots”.

Dual Fiber Port
Instantly switch between delivery devices
Dependability is of crucial importance in both the OR and Office settings. Changing delivery devices is fast and easy. The Novus Spectra automatically senses the delivery devices connected to it. Laser parameters are adjusted internally to compensate for the chosen delivery device to maintain selected power density on the target tissue.

ClearView™ Filters
Optimized view of treatment site
The Lumenis ClearView™ filters’ photopic balanced coating eliminates color distortion of the treatment site while optimizing white light transmission or “brightness” of the physician’s view. A proprietary coating protects the filter from environmental changes and scratches.

User-Friendly
Control Panel & Remote Keypad
A control panel and illuminated remote keypad put all operations literally at your fingertips. Adjusting parameters is always within easy and comfortable reach. Conveniently position the remote control on either side of the slit lamp, or in a sterile cover for the operating room.

The Lumenis “PowerEase™ footswitch provides hands-free power adjustment of the laser by toggling left or right within the footswitch housing.

The Lumenis “Smart™ footswitch contains an integrated proximity sensor which inserts and removes the physician eye safety filter at the moment you slide your foot in and out of the footswitch housing.

* Optional accessory
Lumenis Selecta™ Platform
Retinal, Cataract and Glaucoma Therapy in ONE

Maximum flexibility; minimum footprint

Connect the Novus Spectra to the Lumenis Selecta Duet™ (YAG & SLT) and create the Trio™ - the most robust laser platform in the market, combining YAG, SLT and Photocoagulation technologies. Gain access to infinite possibilities with minimal space requirements.

The innovation does not stop with the most advanced laser and optics. The new Selecta table offers true wheelchair accessibility, optimal space utilization and overall stability by relying on two side columns instead of the traditional one. This highly ergonomic table design excels at maximizing user and patient space, while conveniently maintaining a compact footprint in your office.

Lumenis Vision - Your Preferred Partner

Lumenis Vision is the world leader in laser technologies for ophthalmic applications. Our company offers the widest range of products, an unparalleled product support system, the largest global installed-base of ophthalmic laser products and the largest investment in research and development in our industry.

Since introducing the first laser photocoagulator to ophthalmology in 1970, Lumenis Vision has focused on providing ophthalmologists with innovative laser therapies to preserve and improve the sight of patients worldwide.

Lumenis Vision is renowned for technological breakthroughs and a long list of industry gold standards. Our company pioneered the first argon laser photocoagulator for ophthalmology; the first approved marketer of Nd:YAG photodisruptor lasers; developed and introduced the breakthrough technology of multicolor photocoagulation along with the world’s first Laser Indirect Ophthalmoscope (LIO); developed and brought to market the revolutionary SLT technology for managing POAG, and more.

Today, Lumenis Vision offers you the confidence of doing business with a company that remains committed to ophthalmology and to meeting your needs.

## Lumenis® Certified Service | Certified Engineers & Parts > Reliable Performance > Superior Value > Satisfied Customers

Optimize your investment in Lumenis’ world-leading innovation - choose the industry’s largest Service team with the deepest medical laser, light- and RF-based system expertise. Our Customer Engineers are fully certified, trained and updated on Lumenis technology to ensure compliance with government safety and performance standards. As the original manufacturer, we are best equipped to provide service and certified parts to maximize the availability of your critical assets in active clinical settings, throughout your system’s lifecycle. We provide thorough and complete system servicing on each maintenance visit, backed by unsurpassed technological expertise and support at the local, regional and company level. Our mission is to deliver a timely and effective response to your system maintenance needs - your satisfaction is our ultimate goal!
