Technical Data:

Doms Ecocentric d-plus
with 2-instruments swivelling table:

height: 1650mm (without projector)

length: 1400mm

width: 1020mm

1400mm

(2-instrument table pulled Pos. 2)

weight: 175 kg

(incl. patient chair d-plus)

instrument table (height) 860mm

patient chair

seat, height minimum : 470mm

seat, height maximum: 670mm

lifting power: 1.500 N

connection voltage: 230V/50Hz

power: 1400 VA

low voltage supply, table units: 6V / 12V

protection (unit) IP 20

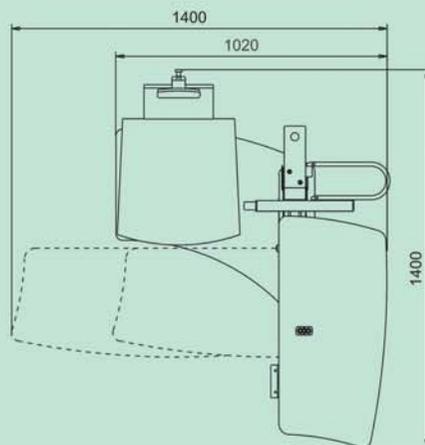

Medical Device Directory / unit class: 1

Certified according to

QM system DIN EN ISO 9001:2000

We reserve the right to change model and form

**compact swivelling table unit
for diagnosis + refraction + contact lens fitting**

DOMS ECOCENTRIC d-plus

is the place saving compact unit.
Complete diagnosis and refraction even with in small rooms.
Solid construction, proven high quality components, precise manufacturing – detailed, even the extraordinary design make this unit very special.

Our expertise in development and manufacturing of units for diagnosis and refraction guarantee high quality in the choice of material, ergonomics, technique and design.

2-instruments swivelling table manually selectable locking position – advantageous e.g. for examining heavier set patients (option: 1-instrument table)

- Room saving , elegant „slipline“ corpus
- Attractive design: matching selection of materials (natural wood veneer „Multiplex Beech“ – matching upholstery (seat, head rest) in bright colors combined with designer stainless steel elements of the unit make a nice atmosphere.
- (automatic switch „on-off“ for table instruments (6V or 12V) according to table position, Rheostat/voltage regulator

1-2 New manual phoropter transfer guide to pull out telescope for mechanical and automatic phoropters.

3 Operating keys (patient chair „up-down“) close to instrument table

4 intelligent solution: mirror for contact lens trial with direct access – simply move in front of patient

5 trial glass case swivelling – turning (the glass case may be easily position in front of the patient)

6 hand-held instruments storage: optionally automatic switch storage (also room light automatic) for hand-held instruments with cord handle (e.g. ophthalmoscope, retinoscope), Heine twin charger or automatic switch bracket for indirect spectacle / binocular head ophthalmoscopes

7 switch illuminated – front of corpus incorporated – switch function extendible with 5 additional keys (e.g. room light / dimmer, working place light, fixation light, room light, room light automatics, curtain function)

7 spectacle storage for patient glasses beside patient chair

8 LED-spot light energy saving, moveable reading lamp close to patient's head

9 patient chair: modern design – upper part of chair (curved back – natural wood veneer „Multiplex Beech“ coated – seat and head part cushioned). The back of the CENTRIC d-plus chair is fixed. The design arm rests are rounded and available in polished stainless steel.

- upholstery parts: high quality, elastic vinyl in attractive colors durable, suited for disinfection detergents (to wipe!)
